BURKE GILMAN TRAIL | Comfortable Connections

Modes Served

Project Description

This project will upgrade the Burke Gilman Trail to more comfortably and safely connect people walking, rolling, and biking on one of the region's most popular trails with destinations along their route. This could include:

- Redesigning, widening, and repaving sections of the trail
- Improving crossings where people using the trail intersect with people using other modes of transportation
- Connect the trail to other bicycle routes and nearby destinations like parks
